Abstract: This device can use in many applications such as physics, chemistry, biology and mathematics. (Maximum 150 word, size 10).

© 2018 Al Muthanna University. All rights reserved.

Keywords: Laser, Fiber, Pulses, Q-Switching, Saturable Absorber, Simulation. (Max. 6 words, size 10)

1. Introduction (12 bold)

The manuscript must written by using MS-word software. The text font is Times New Roman, size is 12 [1,2,3].

1.1 Subsection (12 bold)

Margins for the manuscript published in MJPS are 2.5cm for fourth sides. Display equations should be broken and aligned for two-column display [4], use the equation editor feature as Cambria Math, simple 12. You can choose the suitable space above and below the equation.

$$f(x) = \frac{x^2}{3} \dots + \frac{x^8}{9} \quad (1)$$

2. Methodology (Experimental Procedure)

Figure (1) shows the optical spectrum.

Fig. (1): Optical spectrum.

3. Results and Discussion

4. Conclusion

Tables must insert after the conclusion section. We prefer to put it within the column. If necessary you can maximize it.

Table 1: Data of cosine function.

Acknowledgment. We thank the Microbiology Laboratory for the use of their equipment.
